

COURSE DESCRIPTION:

This half day course is a collaborative effort from the highly skilled physicians of Michigan Surgery Specialists and therapists of Michigan Hand & Sports Rehabilitation. This course highlights both upper and lower extremity injuries as well as rehabilitative interventions and return to work objectives. It is an opportunity for Case Managers to increase their understanding of current rehabilitative concepts.

COURSE OBJECTIVES:

Upon completion of this course, the participant should be able to:

- Review specific upper and lower extremity Injuries and evaluation trends
- Develop an understanding of how therapeutic interventions assists with rehabilitation outcomes.
- Discuss the importance and understanding of new treatment techniques toward returning the patient to optimal functional status.
